

Anallerg[®] -- Calm-S

INCI: Hydroxyphenyl Propamidobenzoic Acid

Product Description

Anallerg[®]-- Calm-S, a highly soothing active ingredient, is a skin soothing agent extracted from oats, also known as hydroxyphenylpropionamidobenzoic acid and dihydroavenous alkaloid D.

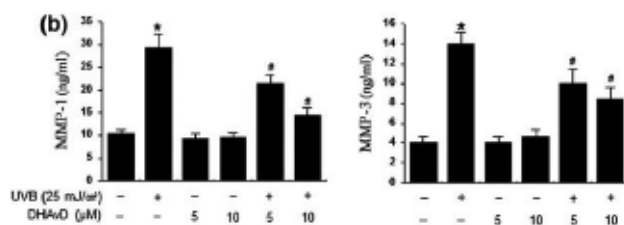

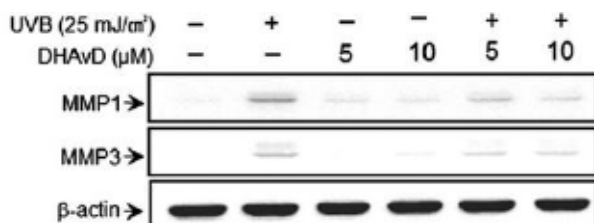

CAS:697235-49-7

Appearance	White to off-white powder
Odor	Characteristic odor
Purity(HPLC, %)	≥99%
Solubility	Slightly soluble in water, soluble in polyols
Dosage	0.02-0.1%

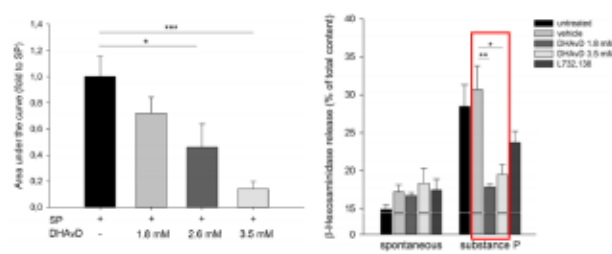

★ Can provide other specifications (customized).

Efficacy Verification

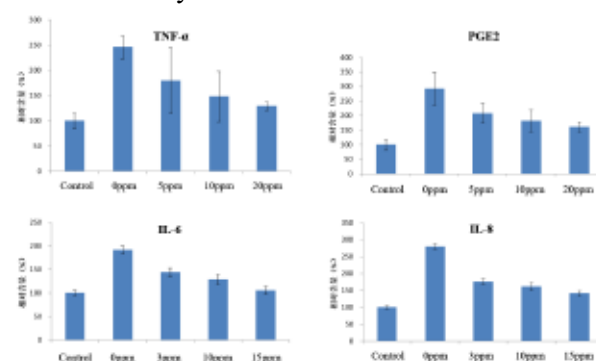

- Hydroxyphenyl Propamidobenzoic Acid(DHAvD) inhibits UVB-induced MMP-1 and MMP-3 protein levels

- NK-1 Receptor antagonist, inhibits SP release and mast cell degranulation

- Inhibits the expression of TNF-α and inflammatory factors

Anallerg[®] -- Calm-S-5C

INCI	Hydroxyphenyl propamidobenzoic acid(5%), Butanediol, Pentylene glycol
Solubility	Slightly soluble in water, soluble in polyols
