

Anallerg[®] - KAVAIN

INCI: Piper Methysticum Leaf/Root/Stem Extract

Product Description

Anallerg[®]-KAVAIN, the main active ingredient in kavalactone, can regulate the release of nerve receptors and neurotransmitters, and has multiple effects such as sedation, anti-inflammatory, antibacterial, and analgesia.

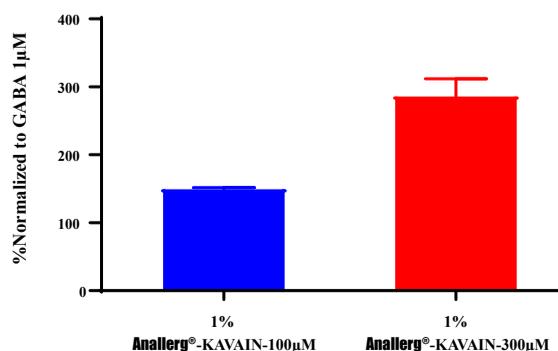

CAS:84696-40-2; 3155-48-4

Appearance	Off-white to light yellow powder
Odor	Characteristic odor
Purity(HPLC, %)	≥98%
Solubility	Slightly soluble in ethanol
Dosage	10ppm-100ppm

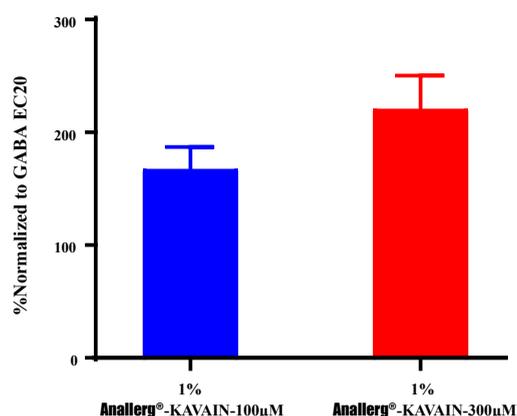

★ Can provide other specifications (customized).

Efficacy Verification

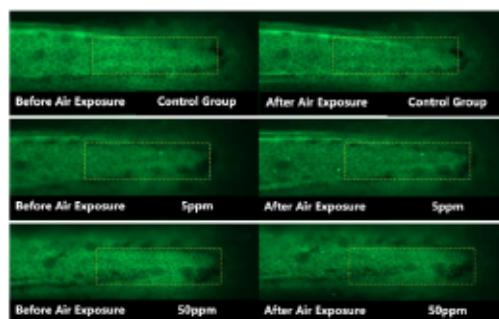

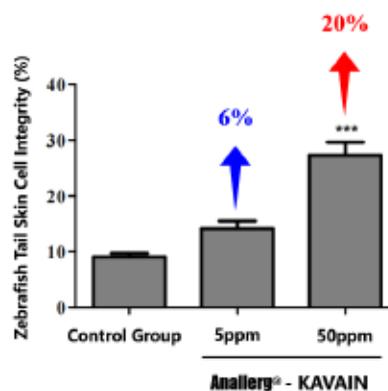

- **Anallerg[®]-KAVAIN** positively regulates the binding of GABA to its receptor GABAA ($\alpha 1\beta 2\gamma 2$)

- **Anallerg[®] - KAVAIN** positively regulates the binding of GABA to its receptor GABAA ($\alpha 4\beta 2\delta$).

- **Anallerg[®] - KAVAIN** (50ppm) has a repairing effect.

After air exposure, the zebrafish skin cell contours disappeared, but KAVAIN restored them
